

First-Line Qualification Questions (Use in Form or Call)

1. Which best describes your organization?

- ☐ Private university / college
- ☐ K–12 private school (with on–prem servers)
- ☐ SME / manufacturing / textile firm
- ☐ Government department or PSDP–funded unit
- ☐ Hospital / healthcare admin
- ☐ Bank / financial institution
- ☐ Other: _____

Is your institution part of a chain?

- ☐ YES: _____
- ☐ NO: _____

2. What systems run on the servers you’d like us to scan? (Select all that apply)

- ☐ HR / payroll
- ☐ Student records / LMS
- ☐ Finance / accounting (e.g., Tally, QuickBooks)
- ☐ Internal file or print services
- ☐ Dev / test / staging environments
- ☐ Research clusters or lab data
- ☐ Core production (e.g., MES, ERP, citizen services)
- ☐ Not sure
- ☐ Other: _____

3. How many internal servers do you manage in Lahore?

- ☐ 1–3
- ☐ 4–10
- ☐ 11–25
- ☐ 25+

3. How many internal servers do you manage outside Lahore?

- ☐ 1–3 CITY: _____
- ☐ 4–10 CITY: _____
- ☐ 11–25 CITY: _____
- ☐ 25+ CITY: _____

4. Have you experienced an unexpected server outage in the last 12 months?

- ☐ Yes → If yes, what was impacted? _____
- ☐ No
- ☐ Not sure

5. Are you currently paying for OEM support (e.g., Dell ProSupport, HPE Care)?

- ☐ Yes
- ☐ No
- ☐ Don’t know

Get Your Free Health Snapshot

→ Scan 3 servers. Remote. No obligation.

Pro Tip:

Add this as a 30–second Google Form linked right after the “Request Free Snapshot,, button:

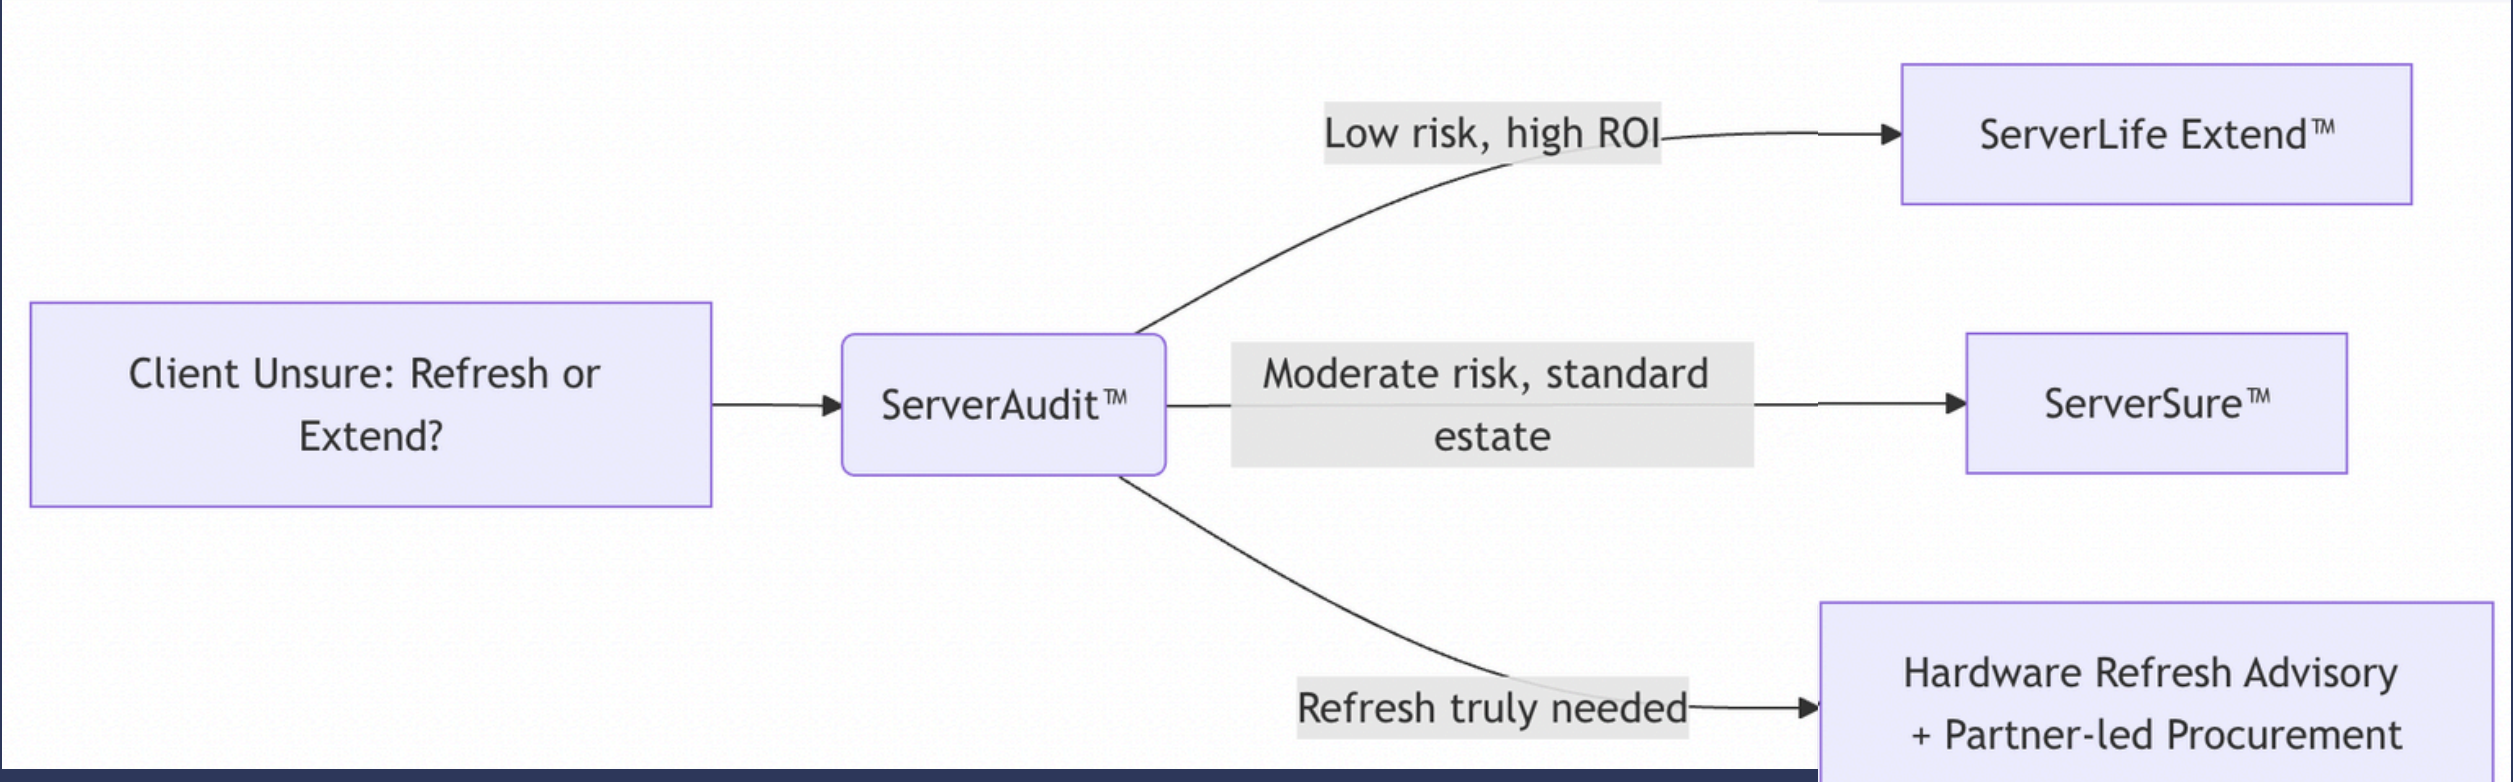

“To ensure your Snapshot is as useful as possible, please answer 3 quick questions,,

This gives you segmentation before you even run the scan so your Day 0 report email can already say:

“Based on your setup, most universities like yours use ServerSure™ for predictable PKR 45K/server/month support.”

How This Informs Your Next Step		
Response Pattern	Likely Path	
University + HR/LMS + 3–10 servers + no OEM	→ ServerAudit™ → ServerSure™	
SME + finance + outage last year + OEM cost pain	→ ServerAudit™ → ModServe™ or ServerSure™	
Govt + PSDP cycle + “not sure” on outages	→ Push Full Audit (PKR 150K+) for compliance	
“Core production” or “MES” selected	→ Flag for ServerLife Extend™ discussion (even if starting with Audit)	
School + student records + <5 servers	→ ServerAudit™ → ServerSure™ (if on-prem confirmed)	

Server Continuity Suite

Marketing Language / Communication	
Get Started: Where Are You in Your Journey?	
If you...	GET: Clarity
<i>Are unsure whether to refresh or extend:</i> Data-Driven Clarity. Stop guessing and start making CapEx decisions based on power, space, and hardware health.	ServerAudit™
	GET: Managed Services: 1) For out of warranty (critical servers) & 2) non critical servers.
<i>Need reliable support departmental systems with predictable, right-sized support</i> Managed Stability. Enterprise-grade support for a flat PKR 45K/mo—eliminating the cost of "premium" bloat.	ServerSure™
<i>Run mission-critical production systems with confidence – even when hardware is out of warranty.</i> Resilience Beyond Warranty. Maintain your production reality with confidence, even on aging hardware.	ServerLife Extend™
	GET: A Refresh
<i>Have approved a refresh but fear downtime</i> Refresh Without Rupture. We wrap your hardware in a service layer to de-risk the "Go-Live" transition.	ModServe™

CONTEXT:
Server Continuity Suite: Strategic Sales Roles for all 4 services

Client Scenario	Service	Primary Role / Sell & Success criteria	Commercial Intent	Why It Fits	Mindset Shift (The "Gap")
"Unsure whether to refresh or extend"	Server Audit™ The Hook (Top-of-Funnel)	Function: It is a low-friction "entry point" designed to start a conversation without the pressure of a hard sale. Success Metric: Number of "snapshots" converted into proposals.	Purpose: - To transform you from a "Vendor" into a "Trusted Advisor" by providing data before asking for a check. - Already places you in a position of trust for further consideration.	- Removes guesswork; - qualifies leads; - positions you as advisor, not vendor	From: "I'm guessing." To: "I'm making a data-backed decision."
"Need reliable support for departmental systems with predictable cost and right-sized support."	Server Sure™ The Money Maker (Core Volume)	- Providing Right-Sized Stability. - Predictable cost - It's the transition from "Emergency Repairs" to "Managed Utility." - You are selling the peace of mind that departmental engines will run without "Insurance Bloat" or bill-shocks. SUCCESS METRIC: MRR Velocity & Density: 1. Monthly Recurring Revenue (MRR) Growth: Total net-new seats per month. 2. Density: Total number of servers per client (aiming for multi-department clusters).	Scalable MRR: Build a predictable revenue floor with high-volume, 45K/mo seats. - By pricing at PKR 45K/mo, you underprice the bloated OEM "Premium" contracts while maintaining high margins through 9-to-5 operational efficiency.	Serves largest segment (SMEs, universities, govt depts); The "Easy Yes" Price Point: At PKR 45K, the service falls within many "discretionary" departmental budgets, bypassing the need for complex board-level CapEx approvals. Operational Efficiency: Because it is optimized for 9-to-5 efficiency, your team isn't "on-call" for non-critical issues at 3:00 AM, allowing you to manage more servers with fewer staff members. Low Barrier, High Retention: The month-to-month or low-commitment structure makes it easy for a client to start. Once they experience the "Managed Stability," the cost of switching back to "Break-Fix" chaos becomes a barrier in itself.	From: "Fix it when it breaks." To: "Managed stability is a utility, like power."
"We have the budget for new Dell/Huawei hardware, but we can't afford the 'Migration Rupture' that usually comes with it"	ModServe™ The Bridge (Hardware + Readiness)	The Bridge: Connecting the old infrastructure to the new without a "rupture" in service. Hardware + Readiness. We don't just sell you a Dell or Huawei box; we wrap it in a service layer to ensure a "Refresh Without Rupture." SUCCESS METRIC: - Total Hardware Sales Volume % Conversion to ServerSure™ - How quickly a project-based "Refresh" client is onboarded into your recurring revenue ecosystem. - Migration Success Rate	The Revenue Gateway: Strategically captures one-time CapEx refresh budgets while creating the perfect "attach point" for 3+ years of recurring revenue.	The "Bridge" Strategy: ModServe™ isn't just a delivery service; it is a Risk Mitigation Layer. You aren't selling them a box; you are selling them the guarantee that the box will actually work within their specific environment from the moment it's plugged in. The Expertise Proof-Point: Serves as a high-stakes gateway to ServerSure™; by mastering the stress of a migration, you prove the expertise required to manage the system indefinitely.	The Outcome Pivot: Beyond the Box Value Realignment: By wrapping hardware in a high-touch service layer, you move the conversation away from "Who has the cheapest price on a server?" to "Who can guarantee our department stays online?" Commodity to Continuity: Shifts the client's purchase from a one-time hardware transaction to a guaranteed operational result. Anxiety Arbitrage: Captures the moment of highest client stress—the "Go-Live"—and de-risks it with local, hands-on readiness that global box-shifters cannot match. Local Advantage: Replaces the distant, automated support of big manufacturers with immediate, on-site expertise during the most critical 24 hours of the system's life.
A premium, high-stakes service for mission-critical systems that have outlived their factory warranty.	ServerLife Extend™ The Trust Anchor (Premium Tier)	Function: To "lock in" the client by protecting their post warranty, most vital production assets & making our team indispensable to their survival. SUCCESS METRIC: Long-term contract "stickiness" and high-margin profitability.	High-margin, sticky contracts (Long-term, SLA-backed, defensible) Deeply integrates P-IT into their mission-critical operations. Hard for them to leave.	Deeply integrates you into the client's "lifeblood" systems; justifies premium pricing and builds enterprise credibility.	From: "Praying for uptime." To: "Insuring the lifeblood of the business."

Marketing Campaign

Tarket Market: Schools and colleges.

Questions:
What other sectors can we target under serverAudit. **(backed by casestudy)**

Proven Case studies:

Marketing Campaign: ServerAudit™ for Schools & Colleges (Lahore Focus)

Component	Details	⬇
Target Market	Private universities, degree-awarding institutes, and elite K–12 schools in Lahore managing on-prem servers for HR, payroll, student records, or internal systems.	
Proven Case Studies	LUMS (university), Punjab Vocational Training Council – Lahore Campuses (public-private vocational), Unique Schools (private K–12 chain) — all used ServerAudit™ to justify support or refresh decisions.	
Core Offer	Free Server Health Snapshot (part of ServerAudit™): • Remote scan of up to 3 servers • 24-hour risk report (Low/Medium/High) • No install, no call, no obligation	
Primary Goal (2026)	Generate 50 qualified leads , convert 15–20 to ServerSure™ or Full Audit, achieving PKR 10M+ ARR from education sector.	

Step	Action	Tools / Channels	Success Metric	⬇
1. Lead Generation	Launch Free Snapshot offer via targeted outreach	• LinkedIn InMail + email • Google Ads ("server audit for schools Lahore") • Referrals from IT educators • PSEB/FPCCI education forums	500 initial contacts → 50 qualified leads (on-prem confirmed)	
2. Qualification	Deploy smart Google Form with conditional logic	Google Forms + CRM tagging: • Chain_HQ vs Individual_School • Systems used, server count, OEM pain	90% of leads pre-qualified before audit	
3. Delivery	Run automated remote Snapshot within 24h	Lightweight agent or IP-based scan PDF report with risk score + clear next step	100% delivery within 24h; <5% failure rate	
4. Nurture	Send 3-email sequence (Day 0, 3, 7)	Mailchimp/HubSpot automation Dynamic messaging by institution type	50% open rate; 20% CTA click-through	
5. Conversion	Guide to right next step based on risk	• Low → ServerSure™ (PKR 45K/server/month) • Medium/High → Full Audit (PKR 150K+) • OEM pain → Cost-comparison brief	30–40% of qualified leads convert to paid action	
6. Scale & Social Proof	Publish anonymized case studies; collect testimonials	One-pagers: "How [School] Avoided Payroll Outage" Video quote (with permission)	2–3 referenceable clients by Q3 2026	⬇

Step	Action	Tools / Channels	Success Metric 
1. Lead Generation	Launch Free Snapshot offer via targeted outreach	• LinkedIn InMail + email • Google Ads (“server audit for schools Lahore”) • Referrals from IT educators • PSEB/FPCCI education forums	500 initial contacts → 50 qualified leads (on-prem confirmed)

This form will:

- Filter out cloud-only schools
- Capture critical scoping data
- Enable personalized follow-up
- Feed clean, tagged leads into your pipeline

**Free Server Health Snapshot –
Qualifying questionnaire For Lahore Schools & Colleges**

FOR INSTITUTIONS MANAGING ON-PREM HR, PAYROLL, OR STUDENT SYSTEMS, GET A FREE, REMOTE HEALTH CHECK OF YOUR INTERNAL SERVERS
NO INSTALL, NO CALL, NO OBLIGATION.

Question 1: Institution Name

- Type: Short answer
- Required: Yes

Question 2: Are you part of a multi-campus school chain?

- Type: Multiple choice
- Options:
 - Yes, we manage IT for multiple campuses from a central HQ
 - No, we are a single-campus or standalone institution
- Required: Yes
- Go to section based on answer:
 - If “Yes” → Continue to Question 3
 - If “No” → Continue to Question 3
 - (We’ll use this answer for CRM tagging — no branching needed yet)

Question 3: Do you manage any on-premises servers in Lahore?

(Not just cloud/email — e.g., Windows/Linux servers for HR, payroll, files, etc.)

- Type: Multiple choice
- Options:
 - Yes
 - No — we use only cloud services (Google/Office 365)
 - Not sure
- Required: Yes
- Go to section based on answer:
 - If “Yes” → Go to Section: Technical Details
 - If “No” or “Not sure” → Go to Section: Thank You (Not Qualified)

Create Section: “Technical Details”

(Only shown if they manage on-prem servers)

Question 4: What systems run on your local servers? (Select all that apply)

- Type: Checkboxes
- Options:
 - HR / staff payroll
 - Student records / LMS
 - Finance / accounting (e.g., Tally, QuickBooks)
 - Internal file or print services
 - Dev / test environments
 - Research or lab data
 - Other: _____
-
- Required: Yes

Question 5: How many servers do you manage in Lahore?

- Type: Multiple choice
- Options:
 - 1–3
 - 4–10
 - 11–25
 - 25+
-
- Required: Yes

Question 6: Have you had an unexpected server outage in the last 12 months?

- Type: Multiple choice
- Options:
 - Yes → If yes, what was impacted? [Short answer]
 - No
 - Not sure
-
- Required: Yes

Question 7: Are you currently paying for OEM support (e.g., Dell ProSupport, HPE Care)?

- Type: Multiple choice
- Options:
 - Yes
 - No
 - Don’t know
-
- Required: Yes

After this section: Go to Section: Thank You (Qualified)

Create Section: “Thank You (Qualified)”

Title: Thank You!

Description:
You'll receive your Free Server Health Snapshot instructions within 1 hour. We'll scan up to 3 servers remotely — no software install needed.

Create Section: “Thank You (Not Qualified)”

Title: Thanks for Your Response

Description:
ServerAudit™ is designed for institutions managing on-prem servers. If your setup changes, we'd be glad to help!

Universities

4. Procurement & Tender Portals
Monitor PPRA (Public Procurement Regulatory Authority) and university tender notices. IT infrastructure bids reveal responsible departments and contacts.
Example: Search ppra.gov.pk for “ICT,” “data center,” or “campus network” tenders from educational institutions.

PROMPT:

Create a combined outreach sequence that auto-adjusts messaging based on whether the lead is a chain or individual school?

1. Lead requests Free Snapshot via web form or ad

Form asks: “Is your institution part of a multi-campus chain?”

- ☐ Yes → Tag as Chain_HQ
- ☐ No → Tag as Individual_School

1. CRM auto-enrolls lead into the correct email sequence
2. Same Snapshot delivery, but tailored context in follow-ups

Email Sequence: Day 0 – Snapshot Delivery

Subject: Your Server Health Snapshot – [Institution Name]

Hi [Name],

Your free ServerAudit™ Snapshot is ready.

{Dynamic Insert}

- If Chain_HQ:

“With multiple campuses relying on your central systems, even minor server issues can cascade. Your report focuses on your core HR/payroll infrastructure.”

- If Individual_School:

“As the person responsible for your school’s IT, you deserve clarity — not guesswork. This report covers your key internal servers.”

Key Findings:

- Disk health: [Status]
- OS patch level: [Status]
- Thermal/reboot risk: [Status]
- Overall risk score: [Low / Medium / High]

→ If Low: Your system is stable. Consider ServerSure™ (PKR 45K/server/month) for predictable support.

→ If Medium/High: A Full Audit (PKR 150K+) can uncover hidden risks like backup gaps or EOL hardware.

Full PDF attached. No call needed — decide with facts, not fear.

CEO, Perception-IT

Email Sequence: Day 3 – Social Proof + Relevance

Subject: How Lahore schools like yours are avoiding midnight outages

Hi [Name],

{Dynamic Insert}

- If Chain_HQ:
 - “A leading 100-campus network used their Snapshot to avoid a payroll failure during salary week — by proactively enrolling central servers in ServerSure™.”
- If Individual_School:
 - “The IT lead at an elite Lahore school told us: ‘I used to dread weekends. Now I know my server won’t fail — because I fixed what the Snapshot flagged.’”

You don’t need enterprise overhead. Just right-sized support for systems that matter.

→ [See ServerSure™ details] | [Request Full Audit]

No pressure. Just peace of mind.

Email Sequence: Day 7 – Soft Close

Subject: Still deciding? Here’s what happens if you wait...

Hi [Name],

Most schools who delay action face one of two outcomes:

1. Unexpected outage during exams/salary week → emergency fixes cost 3x more
2. Overspending on OEM support for non-critical systems

{Dynamic Insert}

- If Chain_HQ:
 - “Your scale means downtime isn’t just inconvenient — it’s reputational.”
- If Individual_School:
 - “You shouldn’t have to be the hero at 2 a.m. — especially when prevention costs less.”

You’ve got the data. Now choose your path:

- Stable? → Start ServerSure™ (month-to-month, cancel anytime)
- At risk? → Get Full Audit (PSDP-ready, 5-day delivery)

We’re here if you need an engineer — not a salesperson.

Technical Setup (Simple)

- Tool: Use Google Forms + Zapier → Gmail/HubSpot

- Fields:
 - Institution name
 - Chain? (Yes/No)
 - Email

- Automation:
 - If “Chain = Yes” → send Chain_HQ sequence
 - If “Chain = No” → send Individual_School sequence

You can even use Mailchimp or MailerLite with merge tags for dynamic inserts.

Why This Works

- One product, two narratives — no extra operational load
- Respects reality: Chains care about scale; individuals care about personal burden
- Maintains brand consistency: Same offer, same tone, same sovereign positioning
- Scales: Add universities later with a third tag (University)

Subject: Free Server Health Snapshot — ServerAudit™ by Perception-IT

Hi [Name],

With 50–300+ campuses, your central HR, payroll, or student systems in Lahore are mission-critical to operations — even if they’re not “production” servers.

Yet most education chains run them on aging hardware with no visibility into disk health, patch gaps, or backup reliability.

We offer a free, remote Server Health Snapshot — part of ServerAudit™ by Perception-IT:

- Scan up to 3 core servers (IP or lightweight agent)
- Get a clear Low / Medium / High risk score in 24 hours
- No software install. No call. No obligation.

Just facts — so you can decide: support, refresh, or leave as-is?

Interested? Takes less than 5 minutes to set up access.
